Research Fields

Information Economics; Mechanism Design; Contract Theory; Industrial Organization

Education

The University of Texas at Austin , Ph.D. in Economics	Expected 2027
Advisor: Vasiliki Skreta	
The University of Texas at Austin , M.S. in Economics	2023
Duke University , M.A. in Economics	2021
Zhejiang University , B.A. in Economics	2019

Research

What to Measure: Optimal Monitoring under Adverse Selection and Moral Hazard (*Job Market Paper*)

Studies optimal monitoring when adverse selection and moral hazard coexist. The principal allocates monitoring resources between learning the agent's private type and observing the agent's hidden action, with implications for the design and value of information.

Screening by Task Assignment (*Work in Progress*)

Studies contract design when agents can conceal or manipulate observed outcomes. Different tasks give agents different opportunities for manipulation, so task assignment changes the set of allocations that can be sustained through screening.

Competition and Privacy in Digital Markets (*Work in Progress*)

Studies how competition shapes firms' incentives to collect, use, and disclose consumer information in digital markets.

Presentations

International Conference and Workshops on Game Theory, Stony Brook University	2026
---	------

Teaching Experience

Teaching Assistant and Grader for the following courses:

- Ph.D. Microeconomic Theory
- Intermediate Microeconomic Theory
- Introduction to Game Theory
- Economics of Auctions
- Introduction to Econometrics

- Economic Statistics
- Real Analysis for Economists

Research Experience

Research Assistant to Arjada Bardhi , Duke University	2020–2021
Research Assistant to John de Figueiredo , Duke University	2020–2021

Honors and Awards

Zhejiang Provincial Scholarship	2018
Scholarship of the Real Estate Research Foundation, Zhejiang University	2017
Scholarship for Outstanding Merit, Zhejiang University	2016–2018

Technical Skills

Python; R; MATLAB; Mathematica; $\LaTeX$
